Writing of the paper was shared between the three authors. In this paper the development of an economical and appropriate acquisition data system combining wired and wireless communication, as well as third party hardware for increased versatility, is presented. Our developed monitoring system is composed of three different modules Master module, Slave module, and Wireless module that will be described in Section 3.

Onlytwoofthemaddressedlivestockdeterrence,oneofwhichwasfromAmeric For a 2 GB USB memory and 20 sensors recording data every minute the system will be able to save data continuously during 10 years. From Wikipedia, the free encyclopedia. Figure3.ThefinalPCBboardsofthethreedesignedmodules,compatiblewith Michael Calore Michael Calore. Data from these data-loggers cannot be sent automatically to the cloud and due to they are commercial devices, its hardware and software is unknown and cannot be modified.
