Caryl-Sue, National Geographic Society. Revisiting the timing and events leading to and causing the Johnstown Flood of 1889. If you have questions about licensing content on this page, please contact us. Rain and poor construction caused the dam to break. First, the wealthy club owners had designed the club's financial structure to keep their personal assets separated from it and, secondly, it was difficult for any suit to prove that any particular owner had behaved negligently. The lake was about 2 miles long and 3 miles wide. He also has a fine sense of humor that is revealed appropriately when recounting the story. Player James George The area surrounding Johnstown is prone to flooding due to its location on the Allegheny plateau, whose upstream watersheds include an extensive drainage basin of the Allegheny plateau.
