Let's say all of these are length one. But they're not quite drawn in in this particular diagram.

And I think that's it for my little tour. Hence they do not appear to us as well-

And so I just put in a hinge perpendicular to the floor, essentially, because we know this is mapping to the floor. So what if we want to fold other stuff. Rubicon models have a sway bar that is basically split in the middle.

We've got a triangle up here, a triangle at the top, triangle on the left. Front assertion must bear criticism. Fun stuff.
