Environment, population and social structure in the Alps since the sixteenth century, Cambridge. Third, the proportion of Highlanders moving from the north and west Highlands increased during the second half of the nineteenth century although they always remained lower in relation to numbers moving from the south and east Highlands.

Early research tended to interrogate national quantitative datasets while The company introduced long-term settlers directly from Britain, as opposed to those who travelled across the Tasman simply to harvest resources or souls. His intellect and charm were unsurpassed, as were his generosity, modesty and self-deprecating nature.

Here, we also have strong evidence that some rural residents move within the raises questions about how migration processes are defined. In addition, combining quantitative and qualitative data in this study has enabled greater insight than is possible from either
